

ASNET-AM: Eduroam (education roaming) Service

**Academic Scientific Research Computer Network of
Armenia (ASNET-AM)**

**Institute for Informatics and Automation Problems (IIAP) of the
National Academy of Sciences of the Republic of Armenia (NAS RA)**

What is eduroam?

Eduroam allows students, researchers and staff from participating institutions to obtain internet connectivity across campus and when visiting other participating institutions quickly and easily without the need to find local login details.

With Eduroam

- Users are becoming more mobile and have more easy connectivity.*
- Have connectivity from everywhere by only one credentials.*
- Receive reciprocal service which is free-of charge to users*

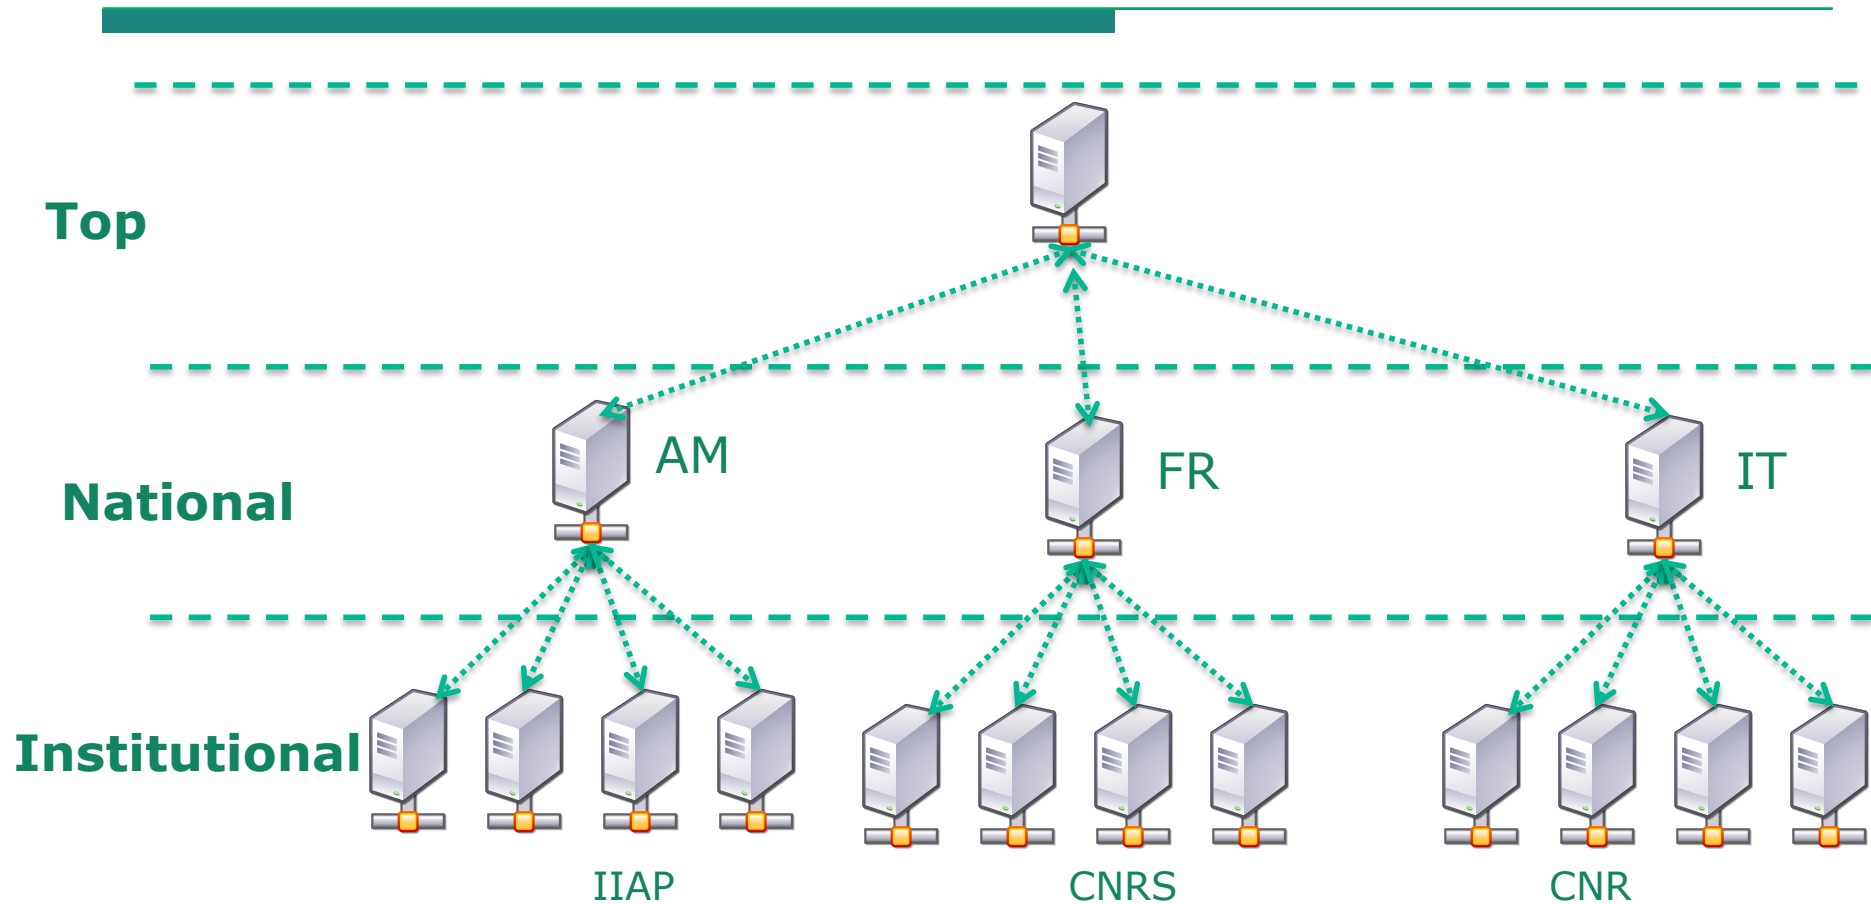

Who is involved in eduroam?

- Eduroam is a secure, world-wide roaming access service developed for the international research and education community.

- Global Stats (more than 1 billion authentications, 73 countries covered)

How it works?

How it works?

Created by Australia's Academic and Research Network
